TRAINING OF TECHNICAL SCHOOL TEACHERS IN HUNGARY

Decree No 5 of the Hungarian Presidential Council, of 1953, provides that, beginning with the 1954-55 school year, the teachers of technical subjects at intermediary technical and apprentice schools shall be trained exclusively at the technical universities. The day school of the Muzsaki Tanarkepzo Foiskola (Technical Teachers Training College, hereinafter Tanarkepzo) will be discontinued at the end of the 1952-53 school year, and the correspondence school of the same institution at the end of the 1954 school year.

The technical universities are required to establish teachers training courses in the departments to be specified jointly by the Minister of Higher Education and the President of the National Planning Office.

Both day and night courses will be given in technical teachers training, and the level of instruction will be the same as in the engineering courses. The curriculum and the scope of examinations will be regulated by the Minister of Higher Education.

After graduation, the student will receive a diploma in engineering qualifying him also for teaching. Graduates of day courses will be required to supplement the course with one year's shop practice, during which they will teach 6 hours a week. Graduates of night courses will be assigned to teaching work without shop practice.

At the beginning of the 1954-55 school year, a chair of pedagogy will be organized at the Budapest Technical University for students of the technical teaching department.

Graduates of the Tanarkepzo may apply for admission to the night of correspondence course of the universities. In justified cases, they may be admitted to the second year of the course.

Decrees No 22 of 1951 and No 11 of 1952 are rescinded as of 31 December 1954.
